Rotary Equipment Design

ROTARY EQUIPMENT DESIGN

1 Introduction (2 hrs)

- What is Engineering & Why It Is Required
- Design & Engineering Stages
- Design Codes and Standards
- Definition Of Key Terms
- Pump Performance Curve
- Pump Configurations As Per API 610
- Basic Design Of Components
- Commonly Used Seal Flushing Plans
- Accessories
- Material Of Construction
- Inspection & Performance Test
- Salient Features of Engineering
- Equipment Selection Criteria
- Design Cases
- Communication with Inter-discipline
- Communication With Bidders/Vendors/Client
- Role of Rotary Equipment Engineer

2 Design & Engineering Stages (0.7 hrs)

- Concept Select
- Front End Engineering And Design
- Basic Design Engineering Package
- Detailed Design And Engineering

3 Design Codes & Standards (0.8 hrs)

- For API Pumps
- For Non-API Pumps
- For Accessories - Driver
- For Accessories - Mechanical Seal
- For Accessories - Coupling
- For Accessories - Machine Monitoring System
- For Dynamic Balancing of Rotating Components
- For Flanges

Rotary Equipment Design

ROTARY EQUIPMENT DESIGN

4 Definition Of Key Terms (1 hrs)

- Definitions As Per API 610

5 Pump Performance & Performance Curve (1.6 hrs)

- What is Pump Performance
- Suction Specific Speed Calculation
- NPSHA Calculation
- How To Plot & Read Pump Performance Curve
- Significance of Performance Curve

6 Pump Configurations As Per API 610 (3 hrs)

- Overhung Type (OH)
- Between Bearing Type (BB)
- Vertically Suspended/Submerged (VS)

7 Basic Design Of Components (0.2 hrs)

- Pressure Casing/ Rotor/ Bearings/ Mechanical Seal

8 Basic Design Of Pressure Casing (1.6 hrs)

- Pressure Casing Design Criteria
- Maximum Allowable Working Pressure
- Casing Nozzles - Size & Rating
- Pressure Casing - Allowable Nozzle Loads
- Co-ordinate System for Nozzle Forces & Moments

Rotary Equipment Design

ROTARY EQUIPMENT DESIGN

9

Basic Design Of Rotor

(1.5 hrs)

- Rotor Design Criteria
- Dynamic Balancing & Balancing Grades of Rotor
- Critical Speed
- Vibrations

10

Bearings Design

(0.6 hrs)

- Bearing Types
- Bearing Selection Criteria

11

Driver Sizing

(0.9 hrs)

- Driver Rating Selection
- Fixed Speed Drive
- Why Variable Speed Drive

12

Coupling Design

(0.9 hrs)

- Coupling Type
- Coupling Design Criteria
- Coupling Selection

13

Coupling Guard

(0.2 hrs)

- Coupling Guard

14

Mechanical Seal

(4.7 hrs)

- Mechanical Seal Types
- Various Seal Plans & Associated Numbers
- Seal plans for Single Seal
- Seal Plans for Double Seal
- Mechanical Seal Designation Code As Per API 682

CONTENT

Rotary Equipment Design

15 Baseplate Design (0.4 hrs)

- Baseplate Design Criteria
- Baseplate API Numbers

16 Material Of Construction (1 hrs)

- Material selection Criteria for Pump Components

17 Inspection Requirement (0.7 hrs)

- Radiography Test
- Magnetic Particle Test
- Liquid Penetrant Test
- Ultrasonic Test
- PMI TEST
- Material Test Certificates - Type
- Material Test Certificates Criteria

18 Testing Requirement (2 hrs)

- Hydrostatic Test
- Performance Test
- NPSH Test
- Mechanical Run Test
- Complete Unit Test
- Noise Test

19 Equipment Selection Criteria (0.5 hrs)

- Factors Affecting Equipment Selection

Rotary Equipment Design

20

Documents Requirement at Site

(0.5 hrs)

- Key Documents & Their Significance

21

Equipment Datasheet Preparation

(2 hrs)

- Mechanical Datasheet for Pump& Mechanical Seal

22

Technical Specification Preparation

(1 hrs)

- Technical Specifications for Pump & Auxiliaries

23

Material Requisition Preparation

(1 hrs)

- Material or Enquiry Requisition

24

Vendor Data & Document Requirement

(1 hrs)

- During Bid Stage/Pre-Order Stage
- Post Order Stage
- As-Built

25

Design Cases for various Flow & Head Combinations

(1.5 hrs)

- Pump Type Selection for Various Flow & Head Combinations

26

Technical Bid Evaluation

(1.2 hrs)

- Bidders' Offer Review
- Technical Queries Preparation
- Technical Bid Evaluation Summary

About Us

Why Choose Us

With vast domain experience, highly capable & equipped Engineering Team we are specialized in providing the most professional Engineering services with fast turn around time. We also help businesses meet their goals with our cutting edge Engineering & Training services.

Mission

Our mission is to deliver world-class engineering solutions with simplicity, precision, and speed, while empowering professionals through comprehensive training that meets global industry standards.

Vision

To create a future where our cutting-edge expertise in engineering solutions and professional training empowers both clients and the industry, making us an indispensable partner in their success.

Our Core Values

1) INNOVATION

We consistently challenge the status quo by exploring new ideas & technologies to deliver creative, cutting-edge solutions.

2) INTEGRITY

We operate with unwavering honesty & transparency, building lasting trust with every client and partner.

3) CUSTOMER FOCUS

We are committed to understanding our clients' unique challenges & providing tailored, value-driven solutions.

4) ETHICS

We collaborate & support one another, believing our collective strength drives the best results for our clients.

Know The Trainer

Vikas Nandapurkar

Vikas is a highly motivated engineering professional and passionate trainer with an exceptional career spanning more than **28 years**. He holds a B.E. in Mechanical Engineering & an M. Tech. in Hydraulic Machines, providing him with a profound academic & technical foundation in rotary and package equipment engineering.

As a veteran in the field, Vikas possesses extensive working knowledge of international codes & standards, including **API & ISO**. His career includes significant contributions to major sectors such as oil & gas exploration, refineries, petrochemical projects, & Green H₂/NH₃ generation FEED projects. He has served esteemed operating companies & global firms including SABIC, Reliance Industries, Fluor Daniel, Jacobs Engineering, & Sulzer Pumps.

Vikas is recognized for his specialized expertise in a wide range of critical equipment, including API 610 Process Pumps, Centrifugal and Screw Compressors, Steam Turbines, & various Utility Packages. He has successfully delivered high-impact training modules on Centrifugal Pumps, Compressors, & Steam Turbines for both in-house teams & as a specialized freelancer.

With a focus on mentoring fresh & early-career engineers, Vikas has successfully upskilled & empowered over 100+ professionals through both online & offline platforms. His training is characterized by a logical, analytical approach to problem-solving & technical troubleshooting, ensuring that participants—ranging from entry-level to those with 15 years of experience—gain the practical, "real-world" skills required to manage complex rotary systems.

His vast experience and dedication to inclusive growth make him an invaluable asset to any engineering professional looking to master the intricacies of Rotary Design and Engineering.

Who Should Do This Course?

How We Can Help..!

This course is designed for professionals who want to gain comprehensive knowledge & practical understanding of centrifugal pump design, selection, & engineering within EPC/EPCM projects. It is ideal for:

- **Mechanical Design & Rotating Equipment Engineers** – who are involved in the design, sizing, & specification of centrifugal pumps & associated equipment.
- **Project Engineers & EPC Professionals** – responsible for engineering deliverables, interface management, & coordination with vendors & clients.
- **Technical Procurement / Bid Evaluation Professionals** – engaged in technical bid evaluation, vendor data review, & post-order documentation.
- **Operations & Maintenance Engineers** – seeking insights into inspection, testing, condition monitoring, & spare parts management for centrifugal pumps.
- **Engineering Graduates & Young Professionals** – aiming to build a strong foundation in pump engineering, codes, standards, and equipment selection.
- **Consultants & QA/QC Engineers** – involved in reviewing pump specifications, design compliance with codes, & project engineering standards.

Key Benefits:

- Learn to bridge the gap between **manual engineering calculations** & practical **equipment selection**.
- Understand **mechanical seal basics, flushing plans, & material selection**, ensuring reliable operation & maintenance.
- Gain hands-on knowledge for preparing **mechanical datasheets, specifications, & interfacing with vendors & clients**.

Design Services

About Us

With vast experience in Static Equipment Engineering, we offer the best, cost-efficient solutions to our customers. Our Engineering team is capable to deliver Design of Pressure Vessel, Heat Exchanger, Condenser, Reactor, Column, Storage Tank, and other static equipment, as per various national and international codes and standards.

The team is well experienced and trained to deliver Design as per ASME Sec VIII Div-1, Div-2, PED, ADMerk Blatter, PD5500, AS1210, GOST, TEMA, API 660, API 650, API 620, IBR, EN13445, etc.

We have successfully completed many ASME U-stamp audits and worked on hundreds of U-stamp vessels closely with many certifying agencies.

Training Services

About Us

Our training program offers a unique and professional platform for engineers to master their skills to meet the demanding requirements of industries. As an Authorized Training Provider for ASME, we stand firmly behind our mission: **“No one can decode the code like us.”** This expertise is rooted in our deep understanding of various national and international standards, delivered by **seasoned industry veterans** who are currently active in their fields to bridge the gap between theory and real-world application.

Drawing on extensive multi-disciplinary expertise, we provide **comprehensive** courses tailored to the rigorous demands of today's market. In a remarkably short time, our **commitment to excellence** has established us as the most trusted and preferred training partner for leading corporations and ambitious individuals globally.

Corporate Training

Onsite Corporate Trainings

We have been instrumental in developing the workforce for organizations through our onsite training under our corporate training program. These training has helped the corporates to develop the skills and knowledge of their resources and as a result increase the output with better and optimized design of equipment.

Advantages Over Offline Courses

Benefits Of Online Training

Offline

Online

No more compromise on work or personal schedule

Getting late for the class. **Need to rush** or I'll miss the lecture.

I can **save travelling time** and **avoid stress** by watching lectures online **as per my convenience**.

Get answers on the go...!

I am stuck in the Project. But this topic is scheduled after 4 weeks in the live class. **How can I solve it now?**

I was stuck..! But I **just watched this topic online** and bingo..! **the problem is solved**. I simply love this platform.

Live Q&A session every week

The Classes are over. **Whom can I ask** the questions now?

My Course **validity is 18 months**. Also the **live Q&A session is twice a week**. I can get all the answers.

BACK TO
INDEX

Advantages Over Offline Courses

Benefits Of Online Training

Offline

Online

Never Miss Out On Any Lectures

I **missed** the last lecture, now I **cannot understand** this...!

This is so cool..! I can **watch any lecture anytime.**

Learn At Your Own Pace

He is teaching **so fast.** It is **very difficult to understand**...!

I can **speed up or speed down** the lecture videos as per my convenience.

No Disturbances | Video Lectures | Animations

This is so **disturbing**...! **Not able to visualize** the concept with these 2d hand sketches

Such **easy to understand** demonstrations with **3d animations** help me to visualize and clear my concepts..!
